Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 10 is rejected under 35 U.S.C. 102(e) as being anticipated by Burnett (U.S. Patent 6,295,004).

Regarding claim 10, Burnett discloses a door pivotable around the horizontal axis thereof (Fig. 1); a switch arranged on the door (abstract), the switch being operable to generate an electric signal when a predetermined pivoting angle of the door is reached as the door is being opened (abstract); and a light source that illuminates the interior of the dishwashing machine (Fig. 1), the light source being disposed in the interior of the dishwashing machine (Fig. 1) and being operably connected to the switch such that the light source is activated into an illuminated condition in response to the receipt of the electrical signal from the switch (abstract).

Allowable Subject Matter

3. Claims 11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 15-18 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter. The prior art does not disclose a light for a door having a weight arranged relative to the retractable button such that the weight is operable under the influence of gravity to increasingly urge the retractable button against the biasing means toward the actuation position as the door is increasingly pivoted away from a vertical position as recited in claims 11 and 15.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Kim (U.S. Patent 5,847,343) discloses a refridgerator door push button switch.

Omron (EP 0160206) discloses a push-button switch.

Bowmar (EP 0157037) discloses a long-stroke push-button switch.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharon E. Payne whose telephone number is (571) 272-2379. The examiner can normally be reached on regular business hours.
